

Motor Vehicle Record Search

Written by Admin

Monday, 24 January 2011 03:13 - Last Updated Saturday, 19 March 2011 00:41

The CDS Motor Vehicle Record search provides an instant search of driving records to identify current and historical information about an individual's driving and license record for a period of three to seven years back from the current date. Motor Vehicle Record searches will reveal the dates and description of the following factors:

-

License Validity

-

Violations

-

Suspensions

-

Revocations

If you are hiring for a position that requires an individual to drive a vehicle while representing your company, it is highly recommended that you add a Motor Vehicle Record search to your criteria.
