

State Criminal Search

Written by Admin

Monday, 24 January 2011 03:15 - Last Updated Friday, 18 March 2011 23:54

The CDS Criminal History search will yield information for all counties in a given State, for States where such information is collated and available.*

CDS State Criminal searches can be run separately or combined with other CDS Background Screening options. [Contact us](#) today for personal assistance.

*While all Counties report criminal information to the State level, there may be gaps resultant of the lag time between the time the County level information is recorded, and the time when the information is updated into a given State's database. Further, Statewide information is not made available by all States, so some States may be excluded from this search option. Alternate methods of searching by single or multiple Counties can be used to include such excluded States; additional charges will apply. [Contact us](#) for more information on how to ensure your State Criminal search is as inclusive as possible.
